WHAT IS JAV BOARD 10?

The JAV Board 10 is an interactive display designed to escalate our traditional conference display equipment such as projector + screen/electronic whiteboard, we can just take it as a giant iPad.

It can meet various needs in meetings, including whiteboard writing, document display, annotation, video playback, live audio, remote video conferencing, etc.

It's an all-in-one tool certified by Google EDLA offers all the applications needed for your productive work.

It's an all-in-one tool like a giant ipad for multiple presenters to work on the file presentation at the same time.

It's an all-in-one tool like a giant ipad for easy writing, modifying, and saving with the cloud-based whiteboard.

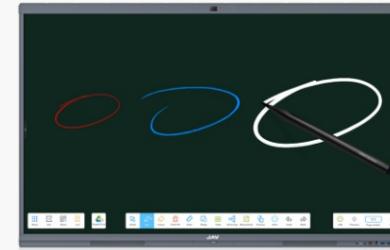

It's an all-in-one tool like a giant ipad for everyone to be included and engaged in the video conferencing.

Easy Presentation With Whiteboard

Our whiteboard software "Note" is carefully designed for users in terms of writing tools, writing canvas, and erasing, so that we can have an easy, enjoyable and efficient whiteboard presentation experience.

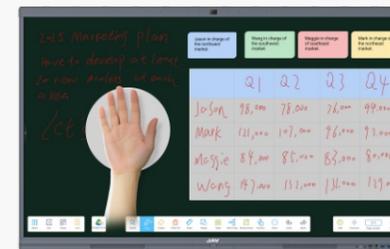

Writing tools

- Adjustable writing pen type
- Adjustable writing pen thickness
- Adjustable writing pen color

Writing Canvas

- Canvas background type adjustable
- Infinite canvas on single page and the bottom navigation can be used to navigate to any place in the infinite canvas
- When a single page is fully occupied, we can also choose to add a new page through the bottom toolbar.

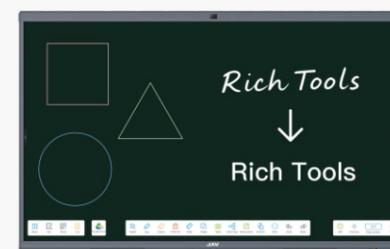

Erasing

- Can be erased directly with the back of our hand
- It can also be selectively erased with the bottom erasing tool toolbar.

Saving and sharing our presentation

- We can save the written content directly to a local folder or to a cloud disk through the menu bar beside.
- We can click "Share" in the lower left corner to generate a QR code. Scan the QR code to save and share the written content.

Other auxiliary tools

- Intelligent recognition of handwriting and hand-drawing
- Auxiliary tools such as rulers, graphics, tables, etc. Click and use.

Easy Presentation With Screen Sharing

We can share the screen of our mobile device to JAV Board 10 through wired and wireless methods.

Wired screen sharing

HDMI: Use HDMI IN port to share your computer screen to the JAV Board 10.

Wireless screen sharing

APP: Our screen sharing apps such as "E-share", start screen mirroring with three steps

- 1) Just connect our device (laptop/ipad/cell phone) and JAV Board 10 to the same network.
- 2) Download the same screen sharing app on our device.
- 3) Open the app on our device and enter the projection code to start the screen mirroring.

The built-in wireless screen sharing function of our cell phone (Airplay/Miracast/DLA): two steps to start screen sharing

- 1) Connect our cell phone and JAV Board 10 to the same network
- 2) Turn on the built-in wireless screen sharing function on our cell phone and start screen mirroring.

JAV Tap: Plug-and-Play with two steps

- 1) Insert JAV Tap to JAV Board 10 for pairing.
- 2) Reinsert it to your laptop after the pairing is successful to start screen sharing. No network required.

Easy File Presentation

Considering the needs of various file presentations during a meeting, we have provided a complete solution here. Our JAV Board 10 supports a variety of file presentation methods. Also, it can support the presentation of various file types, including PPT, WORD, EXCEL, PDF, pictures, videos, etc. During the presentation, it enables us to control it by multiple ways and annotate quickly, and save annotation easily.

Multiple ways for file presentation

File presentation from local file folder

In some important occasions, we can store the files to be presented in the JAV Board 10 in advance, and directly select them from the local folders during the meeting. No need to worry about any emergencies or network troubles.

File presentation from mobile devices

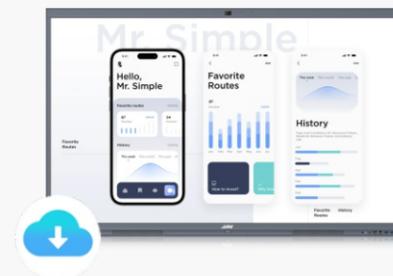

USB/Type-C: Use the USB or Type-C to connect our iPad or mobile phone to JAV Board 10, then we can directly read the files from the mobile device on JAV Board 10.

Screen sharing: We can also present files through the screen sharing function introduced earlier.

File presentation from U disk

Insert the U disk into the front USB or Type-C port, then we can select the file from U disk to present.

File presentation from cloud disk

We can log in to our cloud disk account such as Google Drive and then select files from the cloud disk to present.

Multiple file formats for presentation

Text file presentation

For text files such as PPT, WORD, EXCEL, and PDF, we only need to download WPS from the Google Play Store to start presentation.

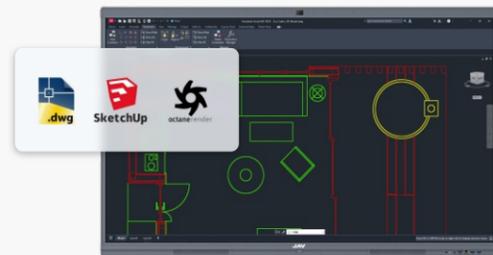

Audio and video file presentation

Our JAV Board 10 comes with built-in picture and video players, and can support various picture formats (PNG, JPG, JPEG...), as well as various video formats (Mp4).

Other file formats presentation

For special file formats, we need to download a corresponding software. For example, for DWG files, we need the AutoCAD.

Multiple ways to control our file presentation

Touchscreen control

The presenter can directly control the page turning, editing, playing, pausing, etc. during the presentation through the touch screen function.

Smart pen control

The presenter can use our smart pen to control page turning, editing, playing, pausing, etc. during the document presentation process.

Mouse Control

The presenter can use an external mouse to turn pages, edit, play, pause, etc. during the presentation.

Easy annotation on our presented file

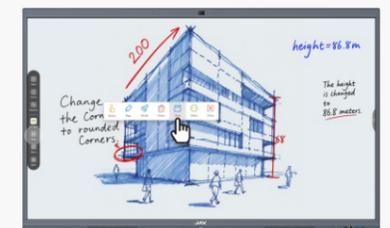

In the process of presentation, we often need to emphasize some key points. Then we can wake up the annotation tools from the side toolbar to do the annotation. The annotation tool can be used in any interface.

When we are presenting text files such as PPT, WORD, EXCEL, etc., we can directly wake up the annotation tool to mark the key points.

When we are presenting pictures or videos, we can also directly wake up the annotation tool to mark the key points.

Saving the annotation, Simply click "Save" on the annotation toolbar to save the annotation content to a local folder.

Easy Video Conferencing

Our JAV Board 10 has got GOOGLE EDLA certified and is compatible with all Google applications. We pre-install Google Meet, and ourselves can also download our favorite video conferencing software, such as Zoom, Micro teams, Skype, Webex, etc.

Local video conferencing

We can initiate a video conference directly through the video conferencing software in the JAV Board 10

Video conferencing from mobile devices- BYOM

When we are initiating a video conference through our mobile devices (laptops, tablets, mobile phones), we can use the BYOM function of the screen sharing APP "E-SHARE " to call the camera, microphone, and speaker of the JAV Board 10.

Visual effects during video conferencing

48MP camera, smart HDR, clearly showing every participant

Auto framing, Our AI camera will automatically frame every participant in the video meeting.

Spokesperson Positioning, Our AI camera will automatically put the spokesperson in the center of the screen to get him/her under the spotlight.

Audio effects during video conferencing

8 array microphones, collect sound over a **10m range**, the spokesperson's voice can be collected clearly and accurately

2*16W loud speakers, so that every on-site participant can hear clearly

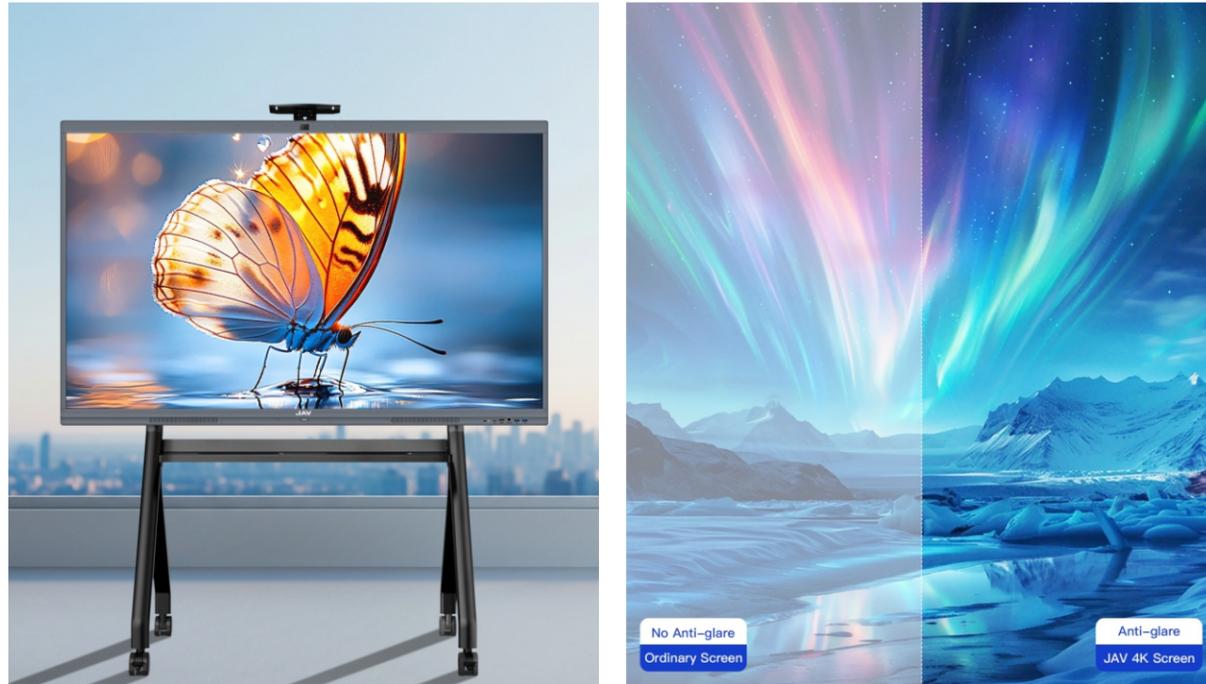

AI intelligent noise reduction, Our AI algorithm will help filter out distracting noises while the microphone is collecting the spokesperson's voice.

Other Performances

4K display, anti-glare design, can still be clearly seen under strong lighting conditions

Both WIFI and Ethernet are available

Wide voltage design, suitable for global power types

Magnetic stylus, easy to store and use

PRODUCT ACCESSORIES

OPS

JAV Board 10 is designed with built-in Android system by default. If we want to run some special software under windows system, we need an extra Windows system OPS, which we will install when the machine leaves the factory.

OPS(Frontal)

OPS(Back)

JAV Tap

In the screen sharing section above, we introduced the wireless screen sharing with JAV Tap without a network. If we need it, it can be configured additionally.

JAV Tap(Frontal)

JAV Tap(Back)

Movable stand

Our machines are wall-mounted by default. If we want a mobile one, we have the following movable stand to choose from. Additionally, we offer the optional electric stand that allows for height adjustment, providing a comfortable viewing and writing experience.

Movable Stand

Electric Stand

Smart Pen

In the file presentation section above, we have introduced our smart pen used to remotely control page turning, editing, playing, and pausing during the presentation. It helps a lot when the presenter interacts with other attendees while controlling the presentation remotely.

Smart Pen

PRODUCT APPLICATION SCENARIOS

Our JAV Board can be used in various scenarios, including meeting rooms, personal offices, social spaces, training halls, classrooms, and homes.
